

DATS join the Microsoft Partner Network

Data Acquisition & Testing Services Limited announces the joining of the Microsoft Partner Network.

Becoming a Microsoft Certified Partner allows DATS to stay connected with industry trends & keep our company up to date with evolving technology.

Keeping up to date with the fast pace of evolving technology is vital in any business but even more so when you are in the demanding instrumentation business, the software we use must be as up to date as it can be.

We believe this partnership will aide us in supporting our customers.

Managing Director Jez Yarnall remarked "Customers are what it is all about and if we can help our customers a little better than we did before then joining the Microsoft Partner Network is the right thing to do."
